"Conservation of Arctic Flora and Fauna (CAFF)" 2013 (2013): CAFF is the biodiversity working group of the Arctic Council and consists of National Representatives assigned by each of the eight Arctic Council Member States, representatives of Indigenous Peoples' organizations that are Permanent Participants to the Council, and Arctic Council observer countries and organizations. The CAFF Working Group operates by the Arctic Council Rules of Procedures. CAFF serves as a vehicle to cooperate on species and habitat management and utilization, to share information on management techniques and regulatory regimes, and to facilitate more knowledgeable decision-making. It provides a mechanism to develop common responses on issues of importance for the Arctic ecosystem such as development and economic pressures, conservation opportunities and political commitments. CAFF is governed by a Chair and Management Board, and supported and coordinated by the International CAFF Secretariat.

"Protection of the Arctic Marine Environment Working Group (PAME)" 2013 (2013):
Protection of the Arctic Marine Environment Working Group (PAME) is one of six Arctic Council working groups. PAME was first established under the 1991 Arctic Environmental Protection Strategy and was continued by the 1996 Ottawa Charter that established the Arctic Council. PAME is the focal point of the Arctic Council's activities related to the protection and sustainable use of the arctic marine environment. PAME carries out activities as set out in bi-annual work plans approved by the Arctic Council on the recommendation of the Senior Arctic Officials.
